NEW AND DISTINCT “**COLEUS.**”

We have raised, by careful fertilization, a large number of handsome and distinct varieties, from which the following have been selected. They are of the most diversified character. In some the leaves are so strikingly cut or serrated that it gives them a fringed appearance, while, in contrast to this, others are almost smooth; the colors are of the richest

description, embracing in the different varieties many shades,—golden bronze, rich dark crimson, some shot with purple on a rosy leaf,—while others have green leaves margined with crimson, and, *vice versa*, crimson margined with green. The leaves of some of the varieties are quite flat, while others are of the old *Verschaffelti* shape. They are, without doubt, the finest and largest variety ever offered for sale.
